SUMMARY

Senior Full Stack Developer with 5 years of experience building enterprise systems, ERP-integrated platforms, workflow automation solutions, and commercial software products. Experienced in technical leadership, software architecture, team mentoring, code reviews, hiring, project estimation, and cross-functional collaboration.

Strong expertise in PHP, Laravel, Vuejs, MySQL, RESTful APIs, and enterprise application development, with professional experience in React, Next.js, Node.js, Redis, PostgreSQL, AWS, and Odoo ERP integrations. Proven track record of modernizing legacy systems, improving application performance by over 20x, and designing configurable platforms that reduce operational costs and repetitive development effort.

CORE COMPETENCIES

- Full Stack Web Development
- Enterprise Application Development
- Database Design & Query Optimization
- Redis Caching & Queue Processing
- Technical Leadership & Team Mentoring
- AWS Infrastructure & Deployment Support
- ERP & Odoo Integration
- Software Architecture & Platform Design
- Workflow Automation Systems
- RESTful API Development & Integration
- Legacy System Modernization
- Agile Development & Engineering Best Practices

EXPERIENCE

UMG Myanmar Jul 2024- Present

Senior Web Developer

- Lead development and maintenance of enterprise web applications supporting finance, HR, training, workflow automation, and operational business processes.
- Serve as the primary senior engineer within the Web Team, providing technical leadership, architecture guidance, project estimation, release planning, and code reviews.
- Led and mentored a team of up to 5 junior developers and interns, conducting technical interviews, onboarding new hires, and establishing engineering standards.
- Modernize legacy applications through database optimization, Redis caching, dependency upgrades, infrastructure improvements, and code refactoring.
- Drive technical decision-making for new projects, including framework selection, architecture design, coding standards, and adoption of new technologies.
- Conduct technical interviews and participate in hiring decisions for web development positions.

Key Projects

Enterprise Workflow Portal (WebPortal)

- Designed a configurable workflow platform reducing dependency on Odoo licenses for 300+ management users.
- Built reusable approval workflows supporting 20+ modules across finance, inventory, sales, purchasing, and accounting.

WinFinance Loan Platform

- Maintained and enhanced a loan origination and approval platform serving 16,000+ customer accounts with Odoo ERP integration.

Training Information System

- Developed enterprise training workflows supporting 2,200+ employees and 1,500+ training programs.

Effective Meeting System (EMS)

- Improved critical workflows by over 20x through query optimization, Redis caching, data migration, and architectural cleanup across 30,000+ meeting records.

Additional Contributions

- Developed FlowDesk, an internal release management, documentation, reporting, and project tracking platform adopted by development and system analysis teams.
- Contributed to Winkyats Remittance Platform, implementing KYC workflows, approval processes, fee calculations, access controls, and administration features.
- Led development and mentoring efforts for customer-facing applications including Majestic Kalaw Hotel and corporate business websites.

Jul 2021 – Dec 2023

Panacea Soft

Junior Frontend Developer → Full Stack Developer

- Progressed from Frontend Developer to Full Stack Developer while contributing to large-scale commercial software products and marketplace platforms.
- Developed and maintained Laravel and Vue.js applications serving multiple industries including classified marketplaces, restaurant systems, customer management platforms, and business solutions.
- Implemented payment integrations, social authentication, notification services, customer support systems, chat functionality, configurable modules, dynamic fields, and administrative tools.
- Participated in product architecture discussions, Git workflows, code reviews, documentation-driven development, and collaborative engineering practices.
- Built strong foundations in scalable software architecture, configurable systems, product development, and maintainable engineering design.
- Contributed to large-scale configurable software products sold to international customers, gaining experience in scalable architecture, product engineering, and commercial software development.

Selected Product Experience

- Multi-Purpose Classified Platform
- Restaurant Management Systems
- Marketplace & Trading Platforms
- White-Label Client Solutions
- Dynamic Builder & Configuration Systems

SKILLS

Languages	Frontend	Backend	Database & Caching
- PHP - JavaScript - TypeScript - Python - SQL	- Vue.js - React - Next.js - HTML5, CSS3 - Tailwind CSS - Ant Design, ShadCN UI	- Laravel - Node.js - Express.js - RESTful APIs	- MySQL - PostgreSQL - Redis
Infrastructure & DevOps	Architecture & Integration		
- AWS (EC2, RDS, S3) - Nginx - Docker - Git	- Bitbucket Pipelines - CI/CD - Cron Jobs	- ERP Integration - Odoo APIs - RBAC - Queue Processing	- Caching Strategies - Domain-Driven Design (DDD)

EDUCATION

2023 - 2025	NCC level 5 diploma (UK)
Twinkle College	NCC Education
2017 - 2020	Computer Science (HPC Major)
University Of Computer Studies	University of Computer Studies, Mandalay Completed Fourth Year Coursework

PROFESSIONAL DEVELOPMENT

- Machine Learning Fundamentals (Linear Regression, Logistic Regression, Classification Concepts)
- Continuous Learning in AI-Assisted Development, Python, Enterprise Architecture, and Modern Web Technologies
